## 4.Now go to Submitter subtab.

file				Open	New	🖶 Save As	Apply to Profile			SUBMIT	TER
count Creation Info	Content Links	Custom	S Submitter   L Submitter	irectory Subn	hitter Article Sut	omitter Bookmark Submit	ter Blog Submitter List	Wizard			
Site List			•	🥬 Open		reads 7	ids 7 Steps Register				•
Thread Display	Display Hidden 👻						Check Mail				
_ink Wheel	No		•				Pinger Keep Alive				
							Custom1				-
Sites		PR	Username	Password	Email	Output	Last Visit	Captcha ID	Link Used		
											_

Open up the packet.Select the number of thread you want to run at the same tme(depends on your pc and on your internet connection.). Captcha manual/automatic (if you have an automatic captcha solving account input it in the global settings).

Thread diplay ->hidden , if It seems that something went wrong run it in visible mode pause before exit on 1 thread.

Click on register tick in steps (to run the registration step)

And then click on start.

After it finishes wait a few minutes 10-20 minutes (some sites delay the email sending by a few minutes).

This template automatically updates the password field from the emails you receive when you run the checkmail step.(wordpress sends the password by email)

Now run Submist step.

After you finished running it you will see the links in the output. So copy the links in the output.
